UNIVERSITY OF HAIFA אוניברסיטת חיפה

University Policy and Commitment

The University of Haifa is committed to building an inclusive, supportive and family-friendly campus for all members of its community. The nursing rooms are one expression of this commitment and reflect the University's ongoing efforts to promote equal opportunities and to support students and staff who combine academic study or work with parenthood.

This initiative is aligned with the United Nations Sustainable Development Goal 5 – Gender Equality. By providing private, comfortable and suitably equipped spaces, the University seeks to enable nursing mothers to continue their studies and work with dignity, and to safeguard their well-being and that of their children.

The establishment of these rooms was carried out in cooperation between the University's administrative units and the student body and is part of the University's continuing commitment to the needs of its students and staff.

Nursing Rooms

In several of the University's buildings there are new and well-equipped nursing rooms for the well-being and use of female students and academic and administrative staff members. The rooms provide various childcare facilities and are equipped with furniture adapted to the needs of the nursing mother and the baby (among others: a refrigerator, a changing table, nursing chairs and toys, like "University for Toddlers").

The nursing rooms were planned, designed and built by the Construction and Maintenance Division, with the assistance of the Dean of Students Office and the Student Association.

Nursing Room Locations:

- Rabin Building – 4th floor, in the stairwell (shelter)
- Main Building – Floor 600, next to the telephone service center
- Mishkan for the Arts Building – 2nd floor
- Education and Sciences Building – 3rd floor (building staff kitchenette)

Directional sign: "Nursing Room"

Nursing chairs, footstools and play mat
